Informacje Główne

Przewodnik Dokumentacji Technicznej

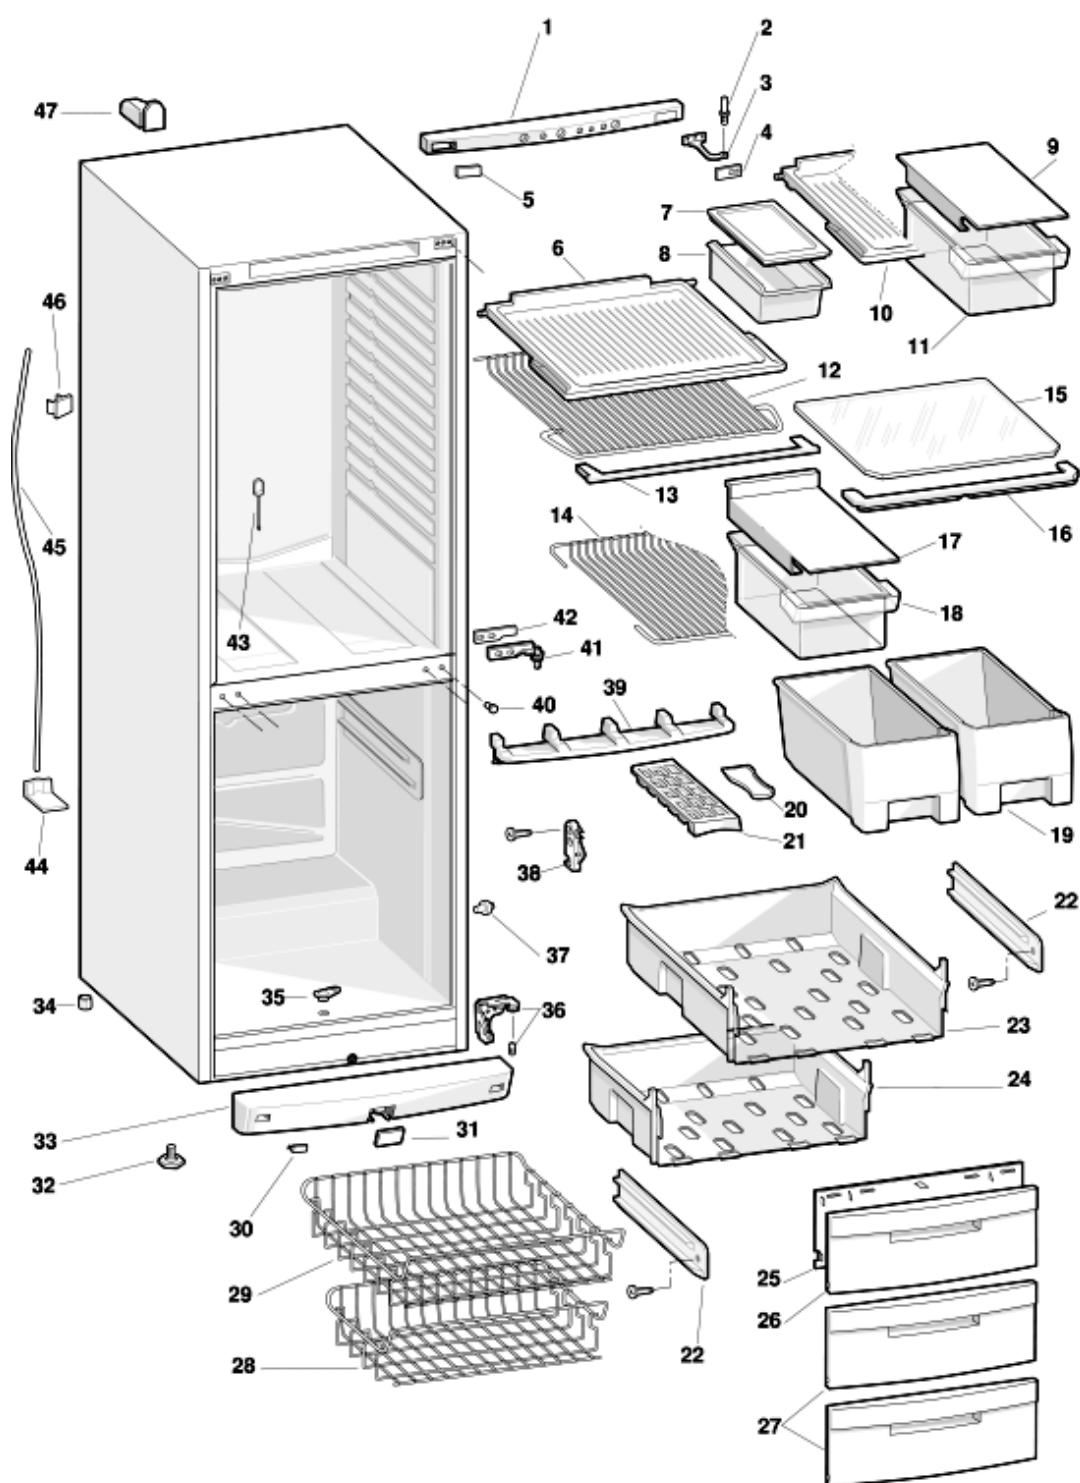

Możesz tutaj odnaleźć podstawowe informacje ułatwiające korzystanie z dokumentacji technicznej

1. Modele tej samej gamy posiadają wspólne rysunki, które przedstawiają najbogatszy zestaw części; generalnie wybrany model niekoniecznie posiadać będzie w spisie części wszystkie pozycje przedstawione na rysunku
 2. Niektóre części nie mogą być przedstawione bezpośrednio na rysunku (instrukcje użytkownika, zestawy montażowe itd.). Można je odnaleźć w liście części pod pozycją gdzie są zainstalowane lub pod pozycją 09
 3. W prawym górnym rogu każdego rysunku widnieje numer seryjny wskazujący początek produkcji danej gamy urządzeń. Niektóre modele mogą posiadać więcej niż jeden rysunek dla podanej kategorii, każdy inny dla różnych numerów seryjnych.
 4. Rysunki złożeniowe mogą wymagać dalszych uaktualnień po ich publikacji. Nowe części zostaną dodane do odpowiednich oznaczeń numerycznych rysunku. Oznaczenie kodowe modyfikacji rysunku zawarte jest w ostatnich 4 cyfrach numeru seryjnego przedstawionego w prawym górnym rogu rysunku.
 5. Lista części odnosząca się do danego rysunku zawiera spis części tylko dla wybranego modelu; dostępne są dodatkowe informacje dla każdej części.
- REF. Numer referencyjny do tabeli; SUBSTITUT: lista części które zastępują dany kod zachowując takie same charakterystyki funkcjonalne
- KOD HANDLOWY: lista wariantów modelu (pokazana w nazwie modelu) gdzie dana część jest zastosowana; UWAGA: kod informacji potrzebny do interwencji, prześledź zmiany aby poprawnie ustalić kod części
6. Niektóre notatki techniczne są ogólne dla danej sekcji, zatem nie mogą być związane tylko konkretną częścią. Aby poruszać się w dokumentacjach modelu sprawnie, pomocne jest czytanie notatek i monitorowanie uaktualnień dokumentacji.
 7. Okładka dokumentacji technicznej przedstawia model sprzętu oraz jego kod handlowy.

Notatki

0518016: COMPRESSORI DANFOSS TUBI PIEGATI

As of the month of April '98 (serial no. 80410.0001), the Danfoss compressors are being used in place of the Necchi models on the "competitive" Ariston and Indesit refrigerators (2 motor version).

The Danfoss compressors being used have the service, intake and drain tubes bent at an angle of 90° and turned upwards. This makes them not interchangeable with respective Danfoss models with the inclined tubes (050298=TL4F - 054725=TL5F - 046374=TL6F).

See fig.5152369B.

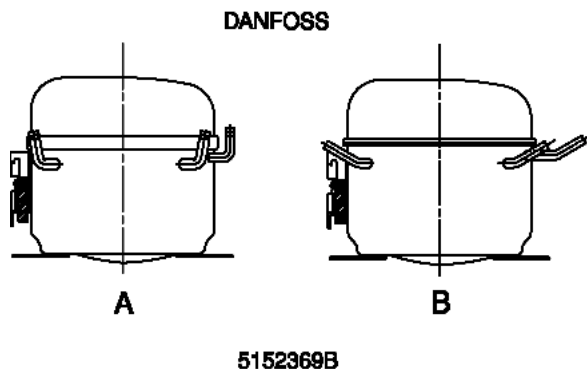

Below is a list of Danfoss compressors with bent tubes (TP):

057138- TL4F Compressor (fridge) for 280-352-382 liter combos;

057009- TLS6F Compressor (freezer) for 320-352-382-402 liter combos;

057010- TL5F Compressor (fridge) for 402 liter combos.

The Danfoss compressors use a condenser (056669) which is different than the one used for the Necchi compressors (047410).

n1025101: Disappearing bulb thermostats (warning!)

The apparatus that provide for the thermostat to be threaded into a small tube located inside the fridge cabinet are noted as versions with "disappearing bulbs".

The bulb must be inserted for a length equal to the position indicated on the colored ribbon (small mark) which confirms the correct position of the bulb in the evaporation area, otherwise causing the poor performance of the apparatus.

Therefore in cases of thermostat replacement it will be necessary to reset on the new, if missing, the same small mark position and always check that the thermostat bulb is completely devoid of the sheath so as to ease its insertion.

The entrance of the small tube, placed in the thermostat container, is protected by a perforation cover in order to avoid the formation of condensation. The perforation cover was initially situated externally and could be substituted with putty or silicone.

For the models with disappearing bulb thermostats, the spare parts are inclusive of the small colored marker, however check that its position corresponds to that on the thermostat that will be replaced.
The spare part description always notes the position of the small marker in millimeters as well as the thermostat initials.

Example : 074519 = THERMOSTAT A13-0547 C. POST FASTEX (L.390)

n1030006: Embossed aluminium freezer evaporators for 600 mm wide combo appliances.

From October 99 (serial no. 910040001), production at Carinaro has been using the embossed aluminium freezer evaporator on 600 mm wide combo appliances, 1-2 motor versions for gas R134a-R600. Previously, the evaporator was paint finished. The modification concerns all Ariston, Indesit and Philco models.

Apart from the equipment to fix the upper plate onto the furniture unit walls, the old evaporators are interchangeable with the new ones.

On aluminium evaporators, the upper plate is fixed to the furniture unit by the right-hand (043837) and left-hand (043838) plate stops, which are fixed by the rivet (014619). On the other plates, the evaporator supports (041978) are used to fix them on the walls, which is the same as for the paint finished evaporators.

The new embossed evaporating groups are the following:

065706 - 330 and 380 litre combo appliances with 1 motor

065707 - 350 and 290 litre combo appliances with 1 motor

065708 - 370 and 400 litre combo appliances with 2 motors

065709 - 335 litre combo appliances with 2 motors

n1030021: Compressor cross piece with wheels on 2/Motor 600 wide combo Ariston - Indesit appliances (Oct. 98)

As of October '98, production at Carinaro has been using the compressor cross piece with wheels on all Ariston and Indesit models of combo freezers, 2-motor versions (600 mm wide).

This cross piece is handled as a spare part with the SAT part no. 031224 of the previous one which didn't have wheels.

New parts

031224 - 2-COMPRESSOR CROSS PIECE (10/98 WHEELS)

601728 - WHEEL PIN

603502 - SMALL WHEEL

n1030023: Ventilated base on Ariston rounded combo appliances 600 wide (Carinaro)

As of April/May '00 (serial no. 00429.0001), production at Carinaro (Italy) has assembled a new base with slots for air-flow on all Ariston models in white with rounded aesthetics (600 mm wide), relative to the combo freezers, upright freezers and single door refrigerators.

For the tek models with the brown base (castoro-18), production began in October '00 (serial no. 01018.0001).

For the stainless steel models with the chromed base, production began in March '01 (serial no. 10312.0001).

The new bases can also be assembled on the pre-modification models, but they need the addition of the flap door.

New parts

074975 - WHITE BASE + DRAIN 596X78X63 (VENTILATED)

074976 - WHITE BASE FLAP DOOR (VENTILATED)

076490 - CASTORO BROWN BASE + DRAIN 596X78X63 (VENTILATED)

076491 - CASTORO BROWN BASE FLAP DOOR (VENTILATED)

081961 - FRONT BASE MOULDING(DRAIN)596X78X63-CHROME

Parts replaced

045985 - WHITE BASE + DRAIN 596X78X63

045986 - WHITE BASE FLAP DOOR

046107 - CASTORO BROWN BASE + DRAIN 596X78X63

046106 - CASTORO BROWN BASE FLAP DOOR

048430 - FRONT BASE MOULDING(DRAIN)596X78X63-CHROME

048429 - BLANKING PLATE (DRAIN SPOUT) - CHROMIUM

n1030037: New compressors Danfoss (high efficiency) - bent tubes on combined 2-engined products (Carinaro)

From September-2001 the production of Carimano (Italy) is using on the combined, ventilated products Ariston, which are convex and 2-engined, new compressors Danfoss 220-240V/50Hz (gas R134A) (high efficiency):

- section of freezer TLY5FK (with running condenser)

- section of fridge TLES4F

in substituting the preceding ones Dansfoss:

- section of freezer TLS6F

- section of fridge TL4F - TLS4F

We remind you that compressors, used on the combined and 2-engined products, have service tubes, aspiration and drain: these are of 90° bent and turned upward. For this reason these kinds of compressors are not interchangeable with the compressors Danfoss with the bent tubes (see Figure 5152369B).

New components:

085076 - COMPRESSOR DANFOSS TLY5FK 220-240/50 R134A T/P

085077 - COMPRESSOR DANFOSS TLES4F 220-240/50 R134A T/P

046312 - PLATE FOR FIXING CONDENSER

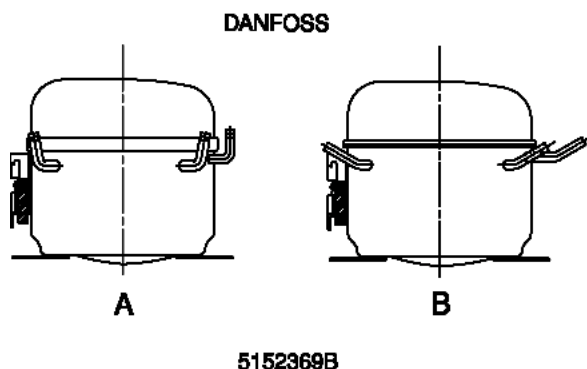

085962 - RUNNING CONDENSER 3 MF (DUCATI)

Substituted components:

057009 - COMPRESSOR DANFOSS TLS6F 220-240/50 R134A T/P

057138 - COMPRESSOR DANFOSS TL4F 220-240/50 R134A T/P

P.S. T/P means bent tubes

n1030038: Motor-ventilator MES (F61-10) with the tangent fan (for models Air)

The motor fan (code 054908) is provided as spare part without the female 2-way block faston, which is used to connect the wiring harness of the piece of furniture, on which the male 2-way block faston is built up.

In general, the female block can be taken back from the product; but when this is not possible, use the two blocks, which have the following codes: male (081107) and female (081108).

n1030047: Combined Ariston ERFV402XS (16844) Carinaro/Setubal production

From the month of November - 2001 the model ERFV402XS (16844) has been produced in two diverse plants : Carinaro (Italy) and Setubal (Portugal).

The Portuguese production differs to the Italian production in relation to the following spare parts :

073734 - INSTRUCTION BOOKLET (ES-PT) RFV385-405L

059188 - FRIDGE THERMOSTAT A13-0497 CENTER POST (vanishing bulb)

051641 - CRISPER COVER 527X318X4(CORNERS 45°) Setubal

Fridge door

024268 - GREY BALANCE 7 MM

082894 - GREY LEFT DOOR CLOSURE BALANCE 49°

082899 - GREY RIGHT DOOR CLOSURE BALANCE 49°

059880 - RED LED LIGHT (on the door panel)

059881 - YELLOW LED LIGHT (on the door panel)

059882 - GREEN LED LIGHT (on the door panel)

Freezer door

048417 - BALANCE CHROMED TAP H.14 D.13,8/9

041825 - GREY BALANCE 2.5 MM

082894 - GREY LEFT DOOR CLOSURE BALANCE 49°

Compressor /condenser

046374 - DANFOSS COMPRESSOR TLS6F 220-240/50 R134A (freezer compartment)

064496 - DANFOSS COMPRESSOR TLES5F 220-240/50 R134A (fridge compartment)

063784 - ARMCO CONDENSER 504X1368 DANFOSS '4/WAY'

The Danfoss compressors do not have tubes bent at 90° and are turned upwards, as described in notices 0518016 and N1030037.

The modifications described in the following notices: 0518016 - N1030006 - N1030021 - N1030023 - N1030037 - N1030038 - N1025101 : have been carried out on the Italian production for this model.

The notices N1030021 - N1030023 - N1030038 - N1025101 relate to both the Carinaro/Setubal production.

Determining the production origin of the model is possible via the name of the manufacturer noted on the registration number plate :

- Italian production (made in ITALY);

- Portuguese production (made in E.E.C or Fabricado in Portugal).

n1030048: Combined Ariston ERFV382XS (16841) and ERFV402XS (16844) SETUBAL production.

From the month of January 2002 (registration no. 20123.0001) the models ERFV382XS (16841) and ERFV402SX (16844) produced in Setubal (Portugal) have been accessorized with three plastic drawers (one lower and two intermediate for the central and upper levels).

The previous production used two small baskets (one lower and one intermediate) and in the upper level a fast freezer compartment. This (048247) compartment, lacking a counter-door (048244), is now mounted on the intermediate drawer of the upper level, while the doors (045966) that were mounted on the small baskets are now used on the other two drawers.

New item codes:

046763 - LOWER DRAWER - WHITE

046762 - MIDDLE DRAWER - WHITE

Replaced item codes:

048244 - FREEZER DOOR FLAP (INNER) 464X180X9-WHITE

045968 - HINGE LH (H.70X20 FREEZER FLAP DOOR) - WHITE

045967 - HINGE RH (70X20-FREEZER FLAP DOOR) - WHITE

045942 - FREEZER BASKET LOWER (464X190X241) - WHITE
