

Philips Domestic Appliances and Personal Care

Service Manual

PRODUCT INFORMATION

Features:

- Full body tanning
- 24 Philips Cleo Performance S tanning tubes
- HPA facial unit
- 30 minute timer with auto-shut-off
- Integrated Body-Cooling
- Stereo Active Speakers
- 2 pair of safety goggles
- This tanning appliance has also been fitted with a scent unit. The scent granules required for this unit can be ordered as service part (see parts list).

Safety:

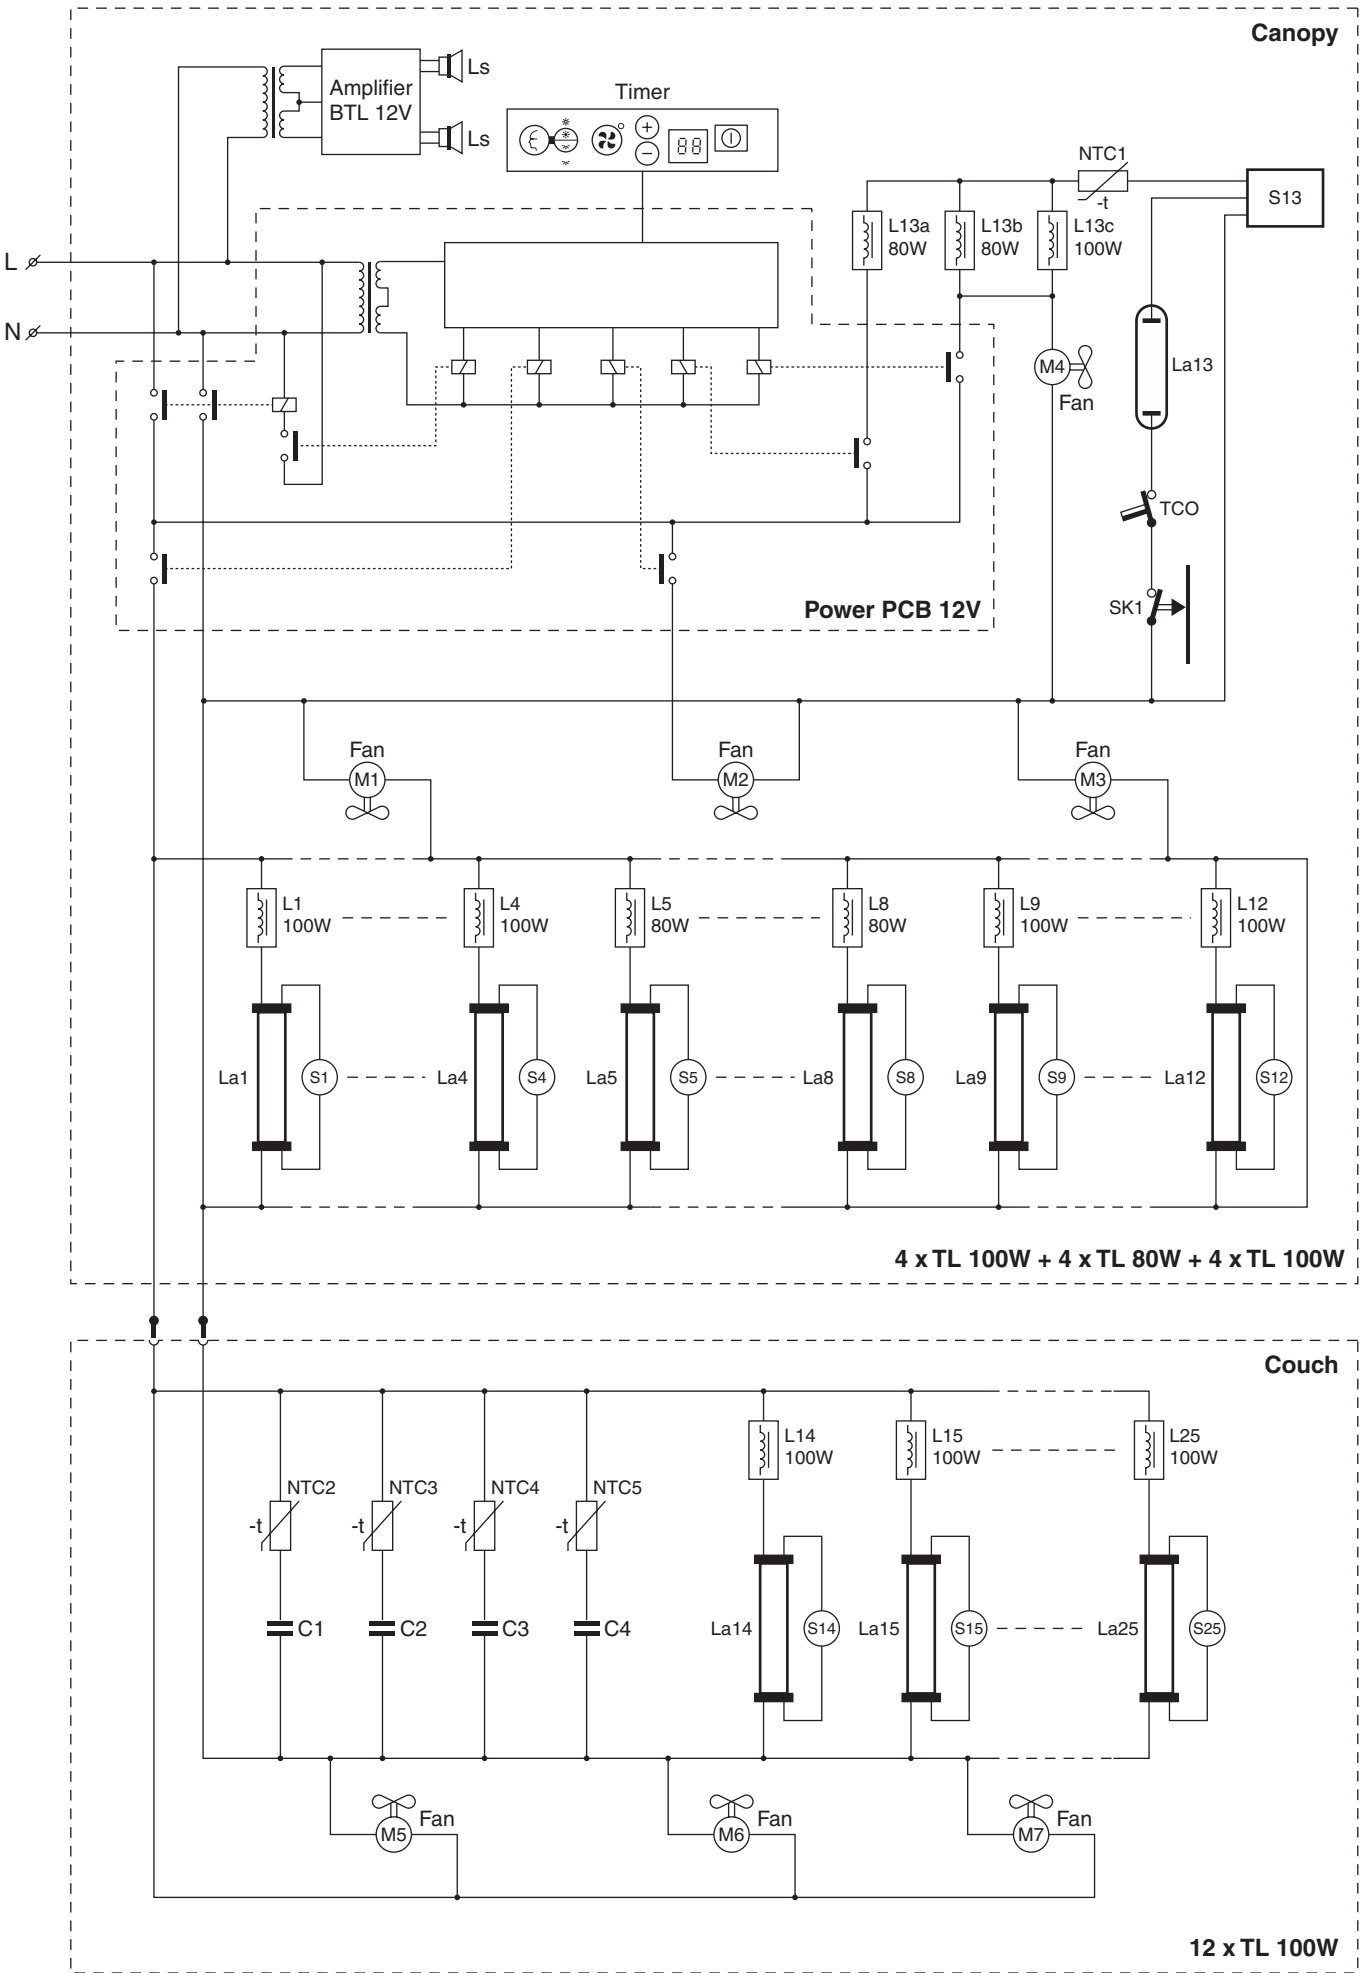

- This product meets the requirements regarding interference suppression on radio and TV.
- After the product has been repaired, it should function properly and has to meet the safety requirements as officially laid down at this moment.

| - Starter facial | : 1 x HPA starter |
| - Ballasts | : 21 x 100 W / 230 V
6 x 80 W / 230 V |
| - Timer | : 1 x 30 mins - digital |
| - Radiation area | : 174 x 58 cm |
| - Protecting goggles | : HB071 - 4822 690 80123 |
| - Output UVX36 meter | : > 5.6 mW/cm ² (couch)
: > 6.0 mW/cm ² at 20 cm (canopy) |
- Measuring with the body cooler switched off

OPTIONAL (accessories)

- No specific issues

- Interchange starters, lamps or ballasts to establish whether they are defective.
- If they are not defective, check the internal wiring, especially that connected to the lamp holders.
- The snap-on connections of the wiring can be detached by means of a paperclip.
- Premature blackening of a tube end points to a defective starter or a wiring fault.
- A burned NTC resistor or overheated wiring points to a wiring fault at the connecting block.
- The acrylic sheets can be cleaned with a moist cloth and some washing-up liquid.
Avoid the use of alcohol, alcohol-based cleaners, petrol, acetone or abrasives.
These substances can cause irreparable damage to the sheets.

CANOPY**Replacement of lamps/starters (items 3, 5 and 28)**

- Loosen the screws (item 25) and remove the end covers (item 10).
- Pull the acrylic sheet (item 27) out of the appliance.
- Now the lamps/starters can be replaced.

Disassembly of gas spring (item 26)

- Fold the canopy up and have a second person lock it in this position.
- Undo two nuts on either side and take the gas spring out of the hinged parts.

Disassembly of fan (item 30)

- Unlock the clamps of the fan cover (item 20).
- Loosen the screws (item 25) and remove the end covers (item 10).
- Loosen the top cover (item 23).
- Now the fan can be replaced.

Disassembly of hinge (items 31, 32 and 33)

- Unlock the clamps of the hinge cover with a screwdriver.
- Loosen the screw (A).
- Ask a second person to depress the locks of the bearing bush (item 33) with two small screwdrivers.
- Position yourself on the other side of the appliance and press the couch with your foot while pulling the canopy slightly (approx. 5 mm) towards you to deactivate the lock.
- Repeat this procedure at the other hinge.
- Now you and the other person should position yourselves at opposite ends of the appliance. Lift the canopy from the stand by pulling at it.
- Place the canopy on a soft surface.
- Remove the lock spring (item 32)
- Tap the bearing bush off the shaft with a plastic hammer.

Disassembly of facial unit (item 44)

- Remove the fan, the end covers and the top cover.
- Contrary to what is indicated in the exploded view, a complete reflector unit with filter glass mounted in a metal frame is supplied as item 44.

COUCH**Replacement of lamps and starters (items 3 and 5)**

- Loosen the screws and remove the end covers (item 10).
- Pull the acrylic sheet (item 2) out of the appliance.
- Now the lamps/starters can be replaced.

Disassembly of fan (item 19)

- Put the canopy in its highest position.
- Turn the appliance on its back with help of a second person.
- Unlock the clamps of the fan cover (item 20).
- Loosen the connecting wires and pull out the fan unit (item 19).
